Supported Versions & Bulk End-of-Support Notification for Manufacturing Product Suite

GE Digital On-Premise Software

Jan 2023

Supported Versions and Bulk End-of-Support Notification for Manufacturing Product Suite for GE Digital's On-Premise Software

Dear Valued GE Digital Customer:

GE Digital appreciates and values your business.

We are writing to inform you of the currently supported versions and End-of-Support dates for a variety of the on-premise software products that fall within our Manufacturing product suite.

This notification applies only to the products listed Table 1 purchased from GE Digital (collectively, the "Products").

Table 1 outlines the currently supported versions of the Products. Customers who purchased such Products from GE Digital can obtain support from us until the specified End-of-Support Date found in the table (End of Support Date). After the End-of-Support date, GE Digital may cease all support for the applicable Product version(s), including through its affiliates, partners, distributors and resellers. If support is required after the End-of-Support Date and, to the extent offered by GE Digital, customers may choose to enter a custom support agreement with GE Digital at GE Digital's then current-fees for such custom support.

We have endeavored to include replacement products or versions offered by GE Digital for the Products where available in the table (which are typically the most current version of the Products).

We thank you for your loyalty and support. If you have any questions or concerns, please contact your relation/account manager or reference https://digitalsupport.ge.com/.

GE Digital Authority

Note:
For some products, GE Digital's policy may be to support the latest versions of those products only, and we may choose to upgrade customers at our discretion. We may also at our option choose to extend support beyond the standard lifecycle dates announced by GE Digital.

About GE

GE (NYSE: GE) is the world's Digital Industrial Company, transforming industry with software-defined machines and solutions that are connected, responsive and predictive. GE is organized around a global exchange of knowledge, the "GE Store," through which each business shares and accesses the same technology, markets, structure and intellect. Each invention further fuels innovation and application across our industrial sectors. With people, services, technology and scale, GE delivers better outcomes for customers by speaking the language of industry.
